Bhalkuti, Birbhum, West Bengal

EDUCATION

B.Tech in CSE (AI & ML), Techno Main Salt Lake

Higher Secondary (WBCHSE), Bolpur High School

Secondary (WBBSE), Bhalkuti High School

CGPA: 7.41 | 2022–2026

Percentage: 91.4% | 2022

Percentage: 83.4% | 2020

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C
- **Computer Vision:** YOLO, YOLO-Pose, OpenCV, MediaPipe
- **Machine Learning & AI:** TensorFlow, Scikit-learn, CNN, Deep Learning
- **Tracking & Re-Identification:** ByteTrack, DeepSORT, OSNet
- **Web Technologies & Database:** HTML, CSS, JavaScript, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Google Colab, Linux, Windows
- **Areas of Interest:** Web Development, ML, Data Science, Data Analytics, Problem solving

EXPERIENCE

- **Google AI-ML Virtual Internship (EduSkills)** | Jul 2024 – Sep 2024
- **Python Full Stack Developer Virtual Internship (EduSkills)** | Apr 2025 – Jun 2025
- **Data Analytics Virtual Internship (Google Cloud & EduSkills)** | Apr 2026 – Jun 2026
- **Smart India Hackathon (SIH) Participant** | Aug 2024 – Oct 2024

PROJECTS

Intelligent Multi-Camera AI Surveillance System for Weapon Detection & Person Re-Identification | Python, YOLOPose, YOLO, OpenCV, ByteTrack, DeepSORT, OSNet

- Developed a real-time AI surveillance system for pistol and knife detection, multi-object tracking, and cross-camera person re-identification.
- Integrated YOLO, ByteTrack, DeepSORT, and OSNet with automated suspect detection, evidence logging, and snapshot generation.

Real-Time Crowd Activity Detection & Heatmap Analysis | Python, YOLO11 Pose, OpenCV, NumPy

- Built an AI-based crowd analytics system for activity recognition (walking, sitting, running, fighting, falling) and behavior monitoring.
- Generated real-time density heatmaps and occupancy analytics for intelligent surveillance and public safety.

Indian Sign Language to Text & Speech Translation | Python, TensorFlow, OpenCV, MediaPipe, CNN

- Developed a real-time Indian Sign Language translation system using CNN and MediaPipe.
- Converted hand gestures into text and speech to improve communication accessibility.

TuneFlix – AI Music & Movie Recommendation System | Python, ML, HTML, CSS, JavaScript

- Developed recommendation system using collaborative & content-based filtering.
- Designed responsive frontend with real-time API integration for entertainment personalization.

Personal Portfolio Website | HTML | CSS | JavaScript

- Designed and developed a responsive portfolio website showcasing projects, skills, and achievements.

CERTIFICATIONS

- Google Cloud Skills Boost Badges
- Earned certificates from Udemy and Coursera
- Active Problem Solver on LeetCode & GeeksforGeeks
